Reduced FGM burner, 44 independent cases: 44 converge, 43 pass
Heat to the burner (bars: reference mesh uncertainty)
Heat loss error, reduced - reference [%]
Mass-flux fraction r
ϕ
State error: position vs. progress
Largest temperature error [K]
same position z (reported)
equal progress C (criterion)
limit
Mass-flux fraction r
Flame position
Front stand-off difference [μm]
limit
Mass-flux fraction r
